SUMMARY

Reliable web developer with a passion for conceptualizing, designing, developing and deploying mobile/web applications. Recent experience in designing and building responsive apps. Professional background also includes working with validated clinical research solutions and addressing quality problems using manual testing methodologies and processes, as well as some automated testing tools. A well organized, effective multi-tasker with strong analytical ability and excellent communication and interpersonal skills.

EXPERIENCE

JUNIOR SOFTWARE DEVELOPER • IBIS INC. • JAN 2019 – PRESENT
Work with the front-end development team building a mobile/web application for clinical data analytics, using React. Responsibilities include writing unit tests to verify functionality, partnering with a Senior Software Engineer to implement discrete components of the solution and participating in daily standups.

SOFTWARE QUALITY ANALYST • IBIS INC. • AUG 2018 – DEC 2018
Performed system tests to formally validate and verify software behavior and performance prior to commercial release. Wrote system test scripts and regression test scripts that needed to be clear in their goals and in the steps of execution.

EDUCATION

RUTGERS UNIVERSITY – DIVISION OF CONTINUING EDUCATION • MAR 2019
Coding Bootcamp
